CAREER OBJECTIVE

Aiming to build a strong career in cybersecurity with a long-term goal of starting my own security firm. Determined to gain practical experience across network security, threat analysis, and risk management to develop the technical depth and industry knowledge needed to get there. Focused on growing through real-world challenges and contributing to an organization where that growth is put to good use.

EDUCATIONAL BACKGROUND

BSc (Hons) Computer Networking & IT Security

2024 – Present

Islington College – London Metropolitan University |
Kamalpokhari, Kathmandu

SLC (Science)

2021 – 2023

Xavier International College – NEB |
Kalopul-32, Kathmandu

SEE

2021

Daffodils Public School – NEB |
Janakpurdham-4, Dhanusha

WORK EXPERIENCE

Junior Technician

2023 – 2024

Unique Cyber | Janakpur, Nepal

- Diagnosed and resolved hardware and software issues on customer PCs, including OS reinstallation, driver updates, peripheral troubleshooting, and system performance optimization.
- Provided technical support to walk-in clients, clearly communicating solutions in a professional and customer-friendly manner.
- Assisted in the setup and configuration of new systems, including operating system installation and software deployment.
- Maintained organized records of technical issues, tracked service activities, and assisted in documenting solutions, strengthening attention to detail and professional reporting skills while gaining exposure to real-world IT support workflows.

SKILLS

Technical Skills

Programming Languages – Python | Java (OOP, GUI-Based Application) | C (Basic System-Level Programming) | SQL

Networking Fundamentals - Network Fundamentals (OSI Model, TCP/IP Model) | IP Addressing (Subnetting, CIDR, IPv4, IPv6) | VLAN Configuration (Segmentation, Inter-VLAN Routing) | Ether Channel (LACP, PAgP) | Switching (DTP, Trunking, Access Ports) | Routing Protocols (Static, OSPF) | NAT & PAT | Access Control Lists (Standard & Extended ACLs) | Network Services (DHCP, DNS, NTP) | Wireless Networking | Network Traffic Analysis (Wireshark)

Security Fundamentals - Linux Security (Users, Permissions, File System) | Malware & Attack Vectors (Trojans, Ransomware, Phishing) | Reconnaissance & Enumeration (Nmap, Footprinting) | Vulnerabilities & Exploits (OWASP Top 10) | Cryptography (Symmetric, Asymmetric, Hashing) | Authentication Protocols (AAA, RADIUS, TACACS+) | Incident Response & Risk Management (ISO 27001)

Operating Systems – Linux | Windows

Tools & Software – Cisco Packet Tracer | VirtualBox/VMware | Wazuh (SIEM) | Ettercap | Wireshark | Nmap | VS Code | MS-Word | MS-Excel

Soft Skills

Clear and Effective Communication | Analytical Thinking and Attention to Detail | Research and Information Gathering | Problem-Solving Mindset | Time Management and Task Prioritization | Team Collaboration | Quick Learner and Adaptable

ACADEMIC & PERSONAL PROJECTS

Gym Management System

Java

Designed a GUI-based system to manage member registration, membership plans, and fee handling. Implemented OOP concepts including inheritance, encapsulation, and polymorphism, with separate classes for regular and premium members.

Inventory Management System

Python

Developed a console-based system supporting product buying/selling, invoice generation, file handling, and error management, following modular programming principles with separated read, write, and operations modules.

Network Security MITM Attack Simulation Lab

Kali Linux, Victim OS

Designed an isolated virtual lab to demonstrate ARP spoofing, DNS spoofing, and network eavesdropping attacks. Captured and analyzed network traffic using Wireshark and evaluated common network security vulnerabilities.

Designed and developed a custom symmetric cryptographic algorithm incorporating with key hashing, dynamic subkey generation, XOR substitution, and bitwise rotation techniques. Implemented encryption and decryption modules in Python, validated algorithm functionality through test cases, and documented the design process as part of a cybersecurity-focused cryptography project.

TRAINING & CERTIFICATIONS

- | **September 2025** Certified in SIEM for Log Management – Islington College
- | **September 2025** Certified in Information System (IS) Audit – Islington College
- Linux Fundamentals Training (Hands-on Labs)

AWARDS & ACHIEVEMENTS

- Consistent Academic Performance Across Networking and Security Modules.
- Successfully Completed Multiple Hands-on Technical Projects Both Within and Beyond Curriculum.
- Active Self-Learner in Linux and Cybersecurity, Regularly Practicing in Home Lab Environments.
- Strong Interest in Cybersecurity Research, Threat Analysis, and Network Defense Principles.
